Surgical implant positioning device - has tubular catheter with rod
having smaller diameter than catheter which can slide to displace
prosthesis

Patent Assignee: BRAUN CELSA SA B (BINT)
Inventor: ANIDJAR S; CHEVILLON G; NADAL G

Abstract (Basic): FR 2748197 A

The device has a tubular catheter (4,6) to be introduced into the anatomical conduit. A rod (1) has a first exterior maximum diameter which is less than that of the catheter to allow it to be introduced for the displacement of the prosthesis and its ejection from the catheter by axial sliding relative to the catheter.

The rod has at least one interior passage (1d) of a greater diameter of the guide wire (2) and it has a first maximum diameter section and a second section of smaller diameter.

ADVANTAGE - Eases insertion of catheters for treating aneurysms.
Dwg.8/13

Title Terms: SURGICAL; IMPLANT; POSITION; DEVICE; TUBE; CATHETER; ROD;
SMALLER; DIAMETER; CATHETER; CAN; SLIDE; DISPLACE; PROSTHESIS

Derwent Class: P32

International Patent Class (Main): A61F-002/04

International Patent Class (Additional): A61F-002/06

File Segment: EngPI
